In re the Application of: **Arei KOBAYASHI, et al.**

ATTN: BOX MISSING PARTS

Serial No.: **10/025,610**

Group Art Unit: **Not Yet Assigned**

Filed: **December 26, 2001**

P.T.O. Confirmation No.: 4491

For: **METHOD AND SYSTEM FOR CODE PROCESSING OF DOCUMENT DATA**

RESPONSE TO NOTICE TO FILE MISSING PARTS

**Commissioner for Patents
Washington, D.C. 20231**

April 16, 2002

Dear Sir:

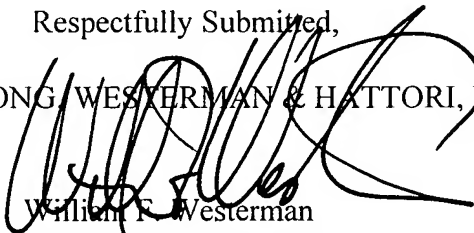

In response to the Notice to File Missing Parts of Application dated **February 25, 2002**, enclosed for filing is the verified English translation of application and statement of verified translation for the above-identified patent application.

Also enclosed is our check in the amount of **\$130.00**, for the surcharge fee of **\$130.00** for filing the late verified English translation. In the event that any additional fees are due with this paper, please charge Deposit Account No. 01-2340.

In the event that this response is not timely filed, applicants hereby petition for an appropriate extension of time. The fees for any such extension may be charged to our Deposit Account No. 01-2340. This paper is filed in triplicate.

Respectfully Submitted,

ARMSTRONG, WESTERMAN & HATTORI, LLP

REQUEST FOR CORRECTED FILING RECEIPT

Commissioner for Patents
Washington, D.C. 20231

April 16, 2002

Sir:

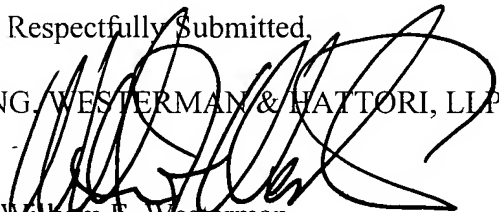

Please supply the undersigned attorney with a corrected filing receipt for the above-identified application. The undersigned also respectfully requests that the Patent and Trademark Office records be amended to reflect the correction.

In reviewing the official Filing Receipt, we noted an error in the total number of claims ("1" should read -8-) and the number of independent claims ("1" should read -2-). A copy of the claims is enclosed which indicates the correct information. We are enclosing a copy of the filing receipt with the corrections highlighted.

In the event that any fees are required in connection with this paper, please charge our Deposit Account No. 01-2340.

Respectfully Submitted,

ARMSTRONG, WESTERMAN & HATTORI, LLP

FILING RECEIPT

OC00000007529643

Date Mailed: 02/25/2002

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Early Publication Request: No

Title

Method and system for code processing of document data

Preliminary Class

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

WHAT IS CLAIMED IS:

1. A method for code processing of document data comprising the steps of:

encoding a document data written in a description language of an extensible text format to a code data, based on a translation table written in a description language of an extensible text format; and

processing said code data as said document data based on said translation table,

said translation table defining link information of other translation tables, defining a code length and a code assigned to items of said link information, an element name, an element value of said element name, an attribute name designated in said element name, an attribute value of said attribute name, and defining a code length and a code assigned for designate parentage structure between one element name and other element name.

2. A method as claimed in claim 1, wherein said items defined in said translation table used in said processing step are a subset of said items defined in said translation table used in said encoding step.

3. A method as claimed in claim 1, wherein said encoding step encodes only the items that are defined in said

translation table.

4. A method as claimed in claim 1, wherein said encoding step includes adding of an occupancy data which indicates a length occupied by said item to a code indicating said item, and wherein said processing step decodes from said code data of a position that skips said occupancy data length of said code, in case that said code not defined in said translation table exists in said code data, without processing said code.

5. A system for code processing of a document data comprising:

server for sending a document data written in a description language of an extensible text format;

encoding server for encoding said received document data to a code data based on a translation table, and sending the code data; and

client for processing of said code data as said document data based on said translation table,

said translation table being written in a description language of an extensible text format, defining a link information of other translation tables, defining a code length and a code assigned to items of said link information, an element name, an element value of said element name, an attribute name designated in said element name, an attribute

value of said attribute name, and defining a code length and a code assigned to designate parentage structure between one element name and other element name.

6. A system as claimed in claim 5, wherein said items defined in said translation table used by said client are a subset of said items defined in said translation table used in said encoding server.

7. A system as claimed in claim 5, wherein said encoding server encodes only said items defined in said translation table.

8. A system as claimed in claim 5, wherein said encoding server adds an occupancy data which indicates a length occupied by said item to a code indicating said item, and wherein said client decodes from said code data of a position that skips said occupancy data length, in case that said code not defined in said translation table exists in said code data.
